For the total herbicides applied to each point on the map go to: [rnef.org/herbicides](http://rnef.org/herbicides).

Mendocino County passed Initiative Measure V by a 62% majority in 2016, prohibiting the intentional leaving of dead standing trees. Absent enforcement pending clarification of the Ordinance requested by County Supervisors from the State Attorney General two years ago, timber companies have continued using herbicides to kill trees and brush. Mendocino Redwood Company is by far the largest user, primarily using Imazapyr and Roundup (glyphosate), on tanoaks and other hardwoods across 109,593 acres of Mendocino County.

Data from information request to Mendocino Department of Agriculture.
